Athletic meets aesthetic.

Is it not sportiness that makes a Mercedes-Benz so unique? With the Mercedes-Benz Collection, we also pay tribute to this claim with fashion. Figure-accentuating cuts combined with materials that are as functional as they are beautiful exemplify pure athleticism – while exclusive details, such as the high-gloss Mercedes star or illuminating colours, exemplify unmistakable aesthetic appeal. Exclusive sports devices such as golf iron made from titanium round off the image in proper style.

Cool gunmetal sets accents and is reminiscent of the high-gloss detachable chrome parts of the AMG models.

Filter categories for sunglasses

Four filter categories are used for sunglasses, based on the degree of tint. Please use the table below to decide which category best suits your needs.

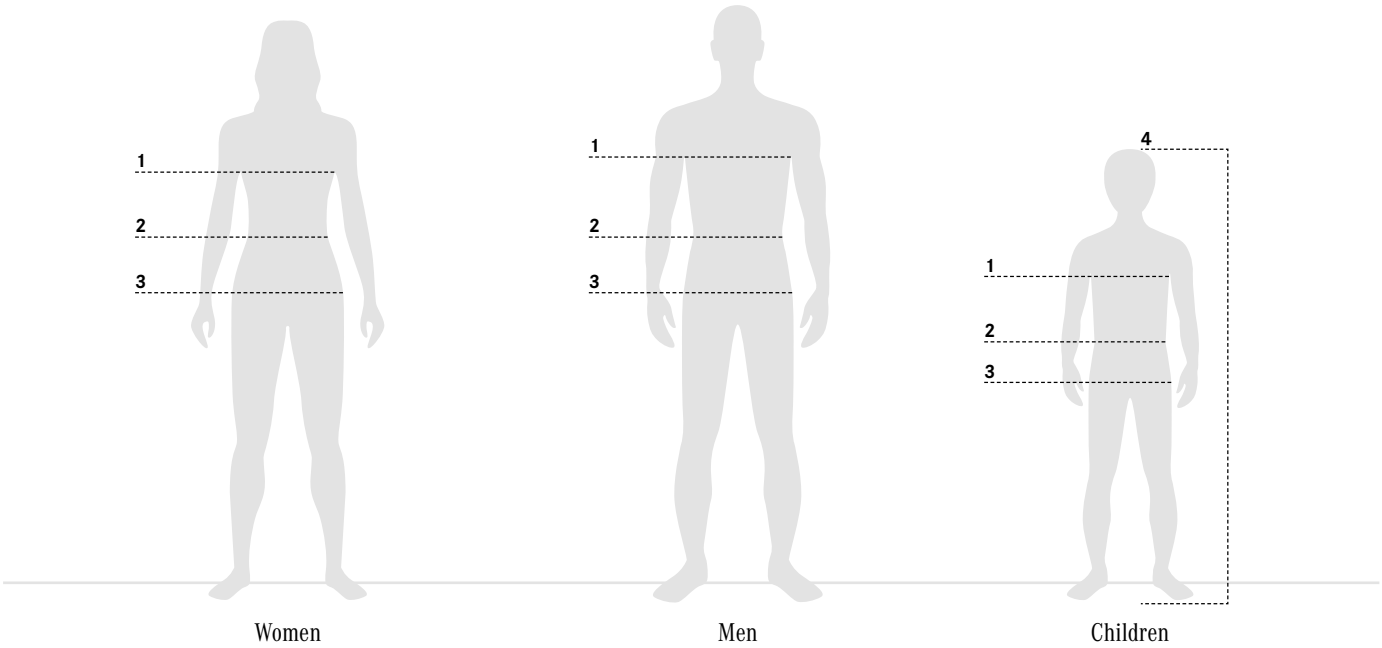

CATEGORY	Tint	Protection/light conditions
1	20–57%	Light protection for overcast days
2	57–80%	Normal protection for summer days in Central Europe
3	80–92%	High protection for expanses of water, beaches and mountains, plus Southern European countries; from 90% tint not suitable for driving!
4	92–97%	Maximum protection for high mountains and glaciers; not suitable for driving!

Clothing sizes

The tables below are designed to help you find your perfect size. It is important to take your measurements correctly. For best results, you should be relaxed and wearing only your underwear. Ideally you should use a tape measure which you should keep close to the body. If you have someone to help you, it will be easier and more precise.

1. CHEST: keeping the tape measure horizontal, measure around the fullest part of the chest
2. WAIST: measure around the waist without drawing the tape measure too tight
3. HIPS: keeping the tape measure horizontal, measure around the fullest part of the hips
4. HEIGHT (for children's clothing): measure from the top of the head to the sole of the feet without shoes

Please note: separate tables are provided for the PUMA brand and the official MERCEDES AMG PETRONAS MOTORSPORT clothing.
